'ELOOD-VERRILL One of the prettiest of the late summer weddings took place in the Seventh Day Adventist Church of South Woodstock Sunday, Sept. 2, at 4 p. m., when Alida Faye Verrill became the bride of Cpl

The church was beautifully deccrated with cut flowers. To the strains of Lohengrin's wedding march played by Mrs Everell Wilson, the bridal party took their places under an arch of ferns and flowers in the center of which was; suspended a large white wedding

Erlon Norris Blood.

Before the wedding march Everell Wilson sang "At Dawning" and just preceding the ceremony he sang "O Promise Me." The ceremony was performed by the bride's father, Rev A J Verrill.

Irving Cummings, AOM 2|c, who has been spending a leave with his parents, returned Tuesday to Boston to report for duty.

feta and carried garden bouquets. The two flower girls were Andrea Poland, in blue silk, and Elaine! Thurlow, in pink silk.

lison and Shirley Benson.

mony a reception was held in the Union School house to over 100, spending a 30 day leave with his relatives and friends. In the reparents, Mr and Mrs Oneil Mills at ceiving line besides the bridal party were the bride's parents, Rev California. and Mrs Alton Verrill of South Woodstock, and the groom's pa - RICHARDS-CHAPMAN ents, Mr and Mrs Lester Blood of Tryeburg. The guest book was in

Work Out Occupation

Its huge guns belching smoke and fire and bombarding the Nipponese coastline just a few weeks ago, the huge 45,000 ton U.S. battleship Missouri was to become the peace ship of World War II, with the Japanese formally signing surrender papers aboard the vessel in Tokyo

Taking place several days after U. S. airborne troops were to descend on the Atsugi airdrome southwest of Tokyo to spearhead the Japanese occupation along with marines landing simultaneously at the Yokasuka naval base 20 miles below the Nipponese capital, the formal surrender ceremony was to see General MacArthur signing for the Allies as a whole, with Admiral Nimitz countersigning for the U. S. and Admiral Fraser for the

In working out the initial occupation plans, General MacArthur and his staff left no stone unturned to assure the safe conduct of the U. S. forces. At the same time, the new Nipponese government headed by Prince Higashi - Kuni strove to prepare the population to accept the American landings peaceably and refrain from riotous outbreaks, imperiling the whole surrender.

Under General MacArthur's plans, the Japanese were ordered to ground all planes and disarm all ships at sea several days before the first U. S. landings. Then, while sprawling Allied fleets moved in close to Nipponese shores, the Japanese were to immobilize all vessels in Tokyo bay and strip coastal guns and anti-aircraft batteries.

As a final precaution, the Japanese were ordered to evacuate all armed forces out of the immediate landing area, to forestall possible attack by fanatical troops. Guides and interpreters were to be furnished to facilitate General MacArthur's control of the occupation territory.

Iap Casualties

In the first full admission of the Intensity of Allied air attacks, the Japanese news agency Domei reported that 44 of the nation's 200 or more cities were almost completely wiped out by bombings, with a toll of 260,000 killed, 412,000 wounded and 9,200,000 left homeless.

dropped on Hiroshima and Nagasaki accounted for 90,000 killed and 180. 000 wounded. Domei said, Declaring the toll may be even greater, the Japs revealed that many of the burned are not expected to survive because of the nature of the wounds, while persons only slightly touched by the fires later weaken and often

Reporting that 2,210,000 homes were completely demolished or burnt down, and 90,000 partly damaged, Domei said that in addition to the 44 cities almost completely wiped out, 37 others, including Tokyo, suffered loss of over 30 per cent of their built-up area. Of 47 provinces, only 9 escaped with relatively minor damage, Domei re-

CHINA:

Key Position

Relieved from Japanese encroachment, and pivotal point of the Orient, China has assumed a renewed importance in the

far east, with Chiang Kai - shek and his Premicr T. V. Soong playing their cards well in the complicated game of international politics. Backed by the

U. S., Chiang's government holds the upper hand in the vast, sprawling nation with its 400. 000,000 people, with its position greatly strengthened in dealings with the Chinese communists, Russia and even Britain.

Chiang and Though the Reds T. V. Soong

have openly defied Chiang, U. S. financial and material support of his regime, plus efforts of Ambassador Hurley to bring the two dissident factions together, have enhanced his standing. In his dealings with Russia, U. S. and British pressure has resulted in recognition of China's sovereignty over Inner Mongolia and Manchuria, though the | dustrial and other goods.

use of the ice-free port of Dairen. By marching his armies into the crown colony of Hong Kong, which the British wish to retrieve, Chiang even struck up a bargaining position with London.

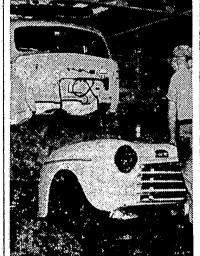

RECONVERSION:

Pace Quickens

Breathless trying to keep up with relaxation of unending wartime controls, the nation contemplated early removal of meat, tire and shoe rationing, even as the government removed restrictions on industry to permit full-steam ahead on reconversion.

Following a previous announcement that the government had abolished packer set-asides on beef, veal and ham supplies for the army and other federal agencies, an early end of rationing was expected with OPA's revelation that it would reduce meat point values in view of military cutbacks in orders and a prospective heavy fall run of cattle.

With the announcement that tire production would be doubled to 4 .-000,000 monthly during October,

With industry given the go-ahead signal for civilian production, manufacturers strove for speedy output for the pent-up postwar market. Here, body is being slung on chassis of one of the first cars to roll off of postwar production line.

November and December, unofficial predictions that rationing of cords would be terminated within 90 days were strengthened.

Forecasts that shoe rationing also may be ended shortly were supported by an announcement of the Tanners Council of America that production of civilian footwear may exceed 30,000,000 pair a month for the rest of the year, the highest level ever reached by the industry.

By lopping off most controls and only retaining authority to assure military and other emergency production, and break bottlenecks in scarce materials for civilian output, the government gave-manufacturers the go-ahead signal on such a wide variety of items as refrigerators, radios, distilled spirits, trucks, oil furnaces, construction machinery, metal furniture, motorcycles, photographic films, storage batteries, waxed paper, sanitary napkins, machine tools, shipping containers, pulpwood and commercial chemi-

Removal of all lumber controls except those necessary to fill priority orders assured a speedy resumption of both industrial and home building construction.

U. S. CREDIT: Supplants Lend-Lease

Following termination of the 41billion-dollar lend-lease program, Foreign Economic Administrator Leo Crowley revealed that the U.S. was prepared to advance six billion dollars in credits to other nations for procurement of material in this country to bolster sagging postwar economies.

At the same time, Crowley said that negotiations might begin within the next year for settlement of lend-lease accounts, which find the S. contributions of 41 billions offset by only 5½ billions in mutual as-

sistance. Under plans outlined by the FEA chieftain, the U.S. would furnish 31/2 billion dollars in long-term credit to nations wishing to purchase goods already contracted for to fill cancelled lend-lease orders. An additional 2 billion 800 million dollars would be advanced for procuring in-

Marines Tell Pacific's No. 1 Fish Story

Fish stories are generally tall stories, but two marines who landed on Iheya island in the Ryukyus recently have an unusual fish story to tell-and it's true! Shortly after the unopposed landing on this mile-long island, dwin-

dling food supplies prompted marine officials to permit the island's fishermen to make a fishing jaunt inside the reef which parallels the shoreline, Staff Sgt. Bob Hilburn reports.

Once fairly out in the water, the group divided into two parties. Each pair of craft rigged up a net between them and then the swimmers, stripped to loin cloths, went over the sides.

Then-and this is the fish story part-the swimmers, by their antics actually drove the fish into the nets.

Chieftains Meet

Here to discuss increased financial assistance for rehabilitating France, internationalization of the Rhineland and re-establishment of his country as a world power, Gen. Charles de Gaulle (left) arrived in Washington, D. C., to be greeted by President Truman.

OUISLING: On Spot

Fighting back savagely, big, bulky Vidkun Quisling was hard pressed in defense of his collaboration with the Germans in Norway as the state presented an avalanche of evidence purporting to show that he had co-operated closely with the Nazis in their heavy-handed occu-

pation of the country. Quisling was first taken back by state presentation of reportedly captured German documents stating that the Nazis had used information supplied by him in their invasion of Norway. The collaborationist also was shaken by charges that he had turned over to the Germans a communist leader blocking his political program and also denied a reprieve to an official sentenced to death for refusal to force Norwegian girls to work for the Nazis.

Throughout the trial. Quisling defiantly asserted that he had played with Naziism in an effort to prevent British establishment of bases in Norway in 1940 and possible invasion of the Scandinavian peninsula by Russia from the north and Germany from the south to thwart the move. He also claimed to have worked fervently from 1918 for the creation of a German, British and Scandinavian bloc to arrest the development of Communism in Eu-

PACIFIC: Ask Bases

Taking a realistic view of the Pacific situation, in which the U. S. looms as the greatest power, the house naval affairs committee demanded that this country be given control over both Allied and former Japanese bases for the construction of a powerful defensive system capable of resisting attack from any direction.

Issued by Chairman Vinson (Dem., Ga.) the congressional proposal urged U. S. domination of the whole Pacific area stretching from the Hawaiians westward to the Philippines and Ryukus, and including the Marshall, Caroline and Marianas islands. In addition, the house committee said, the U. S. should take over American developed bases in the Manus islands in the Australian Admiralties: Guadalcanal in the British Solomons: Espiritu Santo in the British-French New Hebrides and Noumea in French New Caledonia.

Justifying American control over Pacific bases, the house committee eat or carry and tried to destroy cited "the loss of American lives in taking these bases. The expenditure of vast sums of American money in establishing and equipping these bases. The great dependence of the world upon the United States for maintaining peace in the Pacific and world.

SALARIES: Bar Lifted

With President Harry S. Truman having set the pattern for removal of controls over wages and salaries under jurisdiction of the War Labor board, the treasury announced relaxation of restrictions on salaries of administrative, executive and professional personnel under its wartime supervision.

In both cases, employers will be able to grant raises to workers provided they do not use the increase as a basis for requesting higher ceiling prices. In instances where price changes are involved, government agencies will retain authority over proposed raises.

At the same time, the WLB is empowered to grant wage increases where substandard rates are in effect to bring them more evenly in line with living costs.

SKIN TREATMENT:

Establishment of eight centers specializing in the treatment of tropical skin disease was announced by Maj. Gen. Norman T. Kirk, surgeon general of the army.

At the same time the army said that there is no basis for fear of tropical skin infections spreading in this country because practically none of these diseases are contagious and no patient with a transmissible skin disease would be allowed out of an army hospital until he was noninfectious.

WNU Service, 1616 Eye Street, NW, | true that nobody always works at Washington, D. C.

I've just come up from the barnyard of a Maryland farm. In the barn was a comfortable crop of hay and wheat, outside a herd of fat Guernseys of all ages from a two weeks' old calf up. Most of the chickens were already cooling themselves in a locker. There was only one thing for the farmer to complain about and the hogs got a break out of that—the oats.

"Just too wet this year," he said, For fear it would set the barn afire, if he stored it in that condition, the farmer explained that he "had to dump it" and a batch of shoats were leaping around in the spoiled grain like jack-rabbits. Most of the farmers hereabouts lost their oats, too.

All week in Washington, I'd been reading, talking and thinking about farm products along with our other reconversion problems. We, in the United States, are going to get only about three-quarters of what we raise this year, according to unofficial estimates. Europe is going to need about 25 per cent more food and textiles than she normally needs.

I hear the questions asked: Why should we be expected to send all this food to Europe? Why can't she produce her own? Are the people too lazy, or inefficient or what?

I put those two questions to a member of the department of agriculture who is just back from an inspection tour of Europe.

"Europe has always imported food, in peace and in war, in fat years and lean," he answered, "To send food to Europe is the natural thing. Not to send it would be un-

Food Production. To Dip Further

"In 1945, Europe's production was

10 per cent under her normal production. Next year, production will be 15 per cent under this year. That means the people of Europe will mal'times. It does not necessarily mean that the United States will furnish a total of 25 per cent more of everything. For instance, Canada will furnish more wheat than before so we won't have to increase our quota, but we shall probably be called upon for more of the protein

foods, especially the milk products." Before answering my second question, my friend explained the paradox that peace has cut down Europe's producing power. While the European nations were overrun with a conquering army, he elucidated, while part of the fields of the continent were being riddled with shells and later gutted with tanks, production fell off only some 10 per cent from normal. This is the reason:

The Germans had to maintain working economy in the nations they occupied and also they did not wish to destroy the resources of territory which they hoped to exploit. When they knew they were beaten, they stole what they could what they couldn't move; much breeding stock had already been slaughtered.

Of course, we must not be led astray by this figure of 10 per cent -the decrease in the total production in Europe in wartime. There was a sharp cut in certain products and an increase in others. The entire pattern of the agriculture was altered. For example, the livestock raisers always imported feed, When it was cut off there had to be a shift from livestock to root crops. Potatoes and beets make for a very monotonous diet, but they were filling while they lasted.

The Germans organized and regimented farm labor in all countries including their own. They maintained transportation fairly well until just before the invasion. Now transportation is utterly disrupted, there are millions of displaced persons, farm machinery is broken

But this doesn't answer question number two: Why can't Europe feed herself in normal times? Are the people so much lazier or be- been forgotten? Will all our modhind-the-times that they can't make things grow as we do?

Before answering that question, my friend reminded me that it was uses of peace and progress?

through special arrangement with the Washington Bureau of Western Newspaper Union at 1616 Eye Street, N. W., Washington, D. C., is able to bring readers this weekly column on problems of the veteran and serviceman and his family. Questions may be addressed to the above Bureau and they will be answered in a subsequent column. No replies can be made direct by mail, but only in the column which will appear in this newspaper regularly. .

Employment of Handicapped

Both as an inducement for industry to hire handicapped veterans and a protection to both industry and the veteran, 28 state legislatures have now enacted second-injuryfund statutes which, in general, require employers to pay workmen's compensation only for specific sec-

ond injuries. The fund pays the additional costs of permanent total disability resulting from the loss of a hand, arm, foot, leg or eye, following a previous loss of one of these members or organs. The fund is usually financed by payments of fixed amounts by an employer or his insurance company in the case of death of an employee having no dependents. Freed from the fear of heavy permanent total disability charges in these cases, employers are much more willing to employ handicapped workers.

According to records submitted by the department of labor, the cost of maintaining second injury funds is small, for recent studies show handicapped workers are actually more careful than normal employees and have a lower accident frequency.

Employers had been reluctant to nire these handicapped veterans lest they suffer second injuries, become permanently and totally disabled and cost employers increased workmen's compensation charges.

States which have established these second injury funds include Arkansas, Idaho, Illinois, Maine, Massachusetts, Michigan. Minnesota, Missouri, New Jersey, New York, North Carolina, Oklahoma, Rhode Island, South Carolina, Utah, Arizona, Colorado, Iowa, Kansas, Maryland, Oregon, Tennessee Washington and Wyoming. Wisconsin, North Dakota, Ohio and West Virginia have equivalent arrangements while California, Connecticut and Pennsylvania have such legislation pending.

Q.—Can a dishonorable discharge

be changed to an honorable one? A.—A former officer or enlisted man or woman may request a rehearing or a review of his case before wifive-member board in the war and gavy departments. The discharge may be corrected in accordance with the facts. However, these boards may not change the sentence of a court martial.

Q.-Is there an artificial hand available that looks like a hand, and different from the ordinary "hooks" which are most common?

A.—Yes, the navy has developed an artificial hand, made of plastic, that looks like a hand and eliminates the necessity of wearing gloves. It has the consistency of pure rubber and is tinted to match the individual skin. It is operated by a one-pound cam mechanism hidden inside the hand, spring controlled and made of duralumin and permits natural movement of the fingers. Mechanism is operated by a tiny cord running up the arm and around the shoulders, controlled by ting the atom," and releasing the action of the shoulder muscles.

Q.—I was in the regular army before the war and was discharged due to injury in December, 1949. I have since been working in a wat plant and I have a pretty good business opportunity. Do I come under the G.I. Bill of Rights or have I waited too long after my discharge to apply for benefits?

A.-As long as some of your service was after September 16, 1940, you are eligible for G.I. benefits. Assuming you had other than a dishonorable discharge, you may still apply for benefits, since the law requires they must be claimed and secured within two years after discharge, or the end of the war, whichever is later.

Q.—When a soldier's wife receives maternity care under the EMIC rovernment plan, must the application be filed with the Soldier's Relief for payment from the war department? A.—No, the application should be filed with the state health department, through the personal physician or the hospital.

Q.-May a young man marry while he is a cadet in the U.S. Coast A.-The navy department says

hunderhead WINIU. FEATURES ~

THE STORY THUS FAR: Flicka's colt, long overdue, is born on the Goose Bar ranch, high in the Rockies. Its 12-yearold owner, Ken McLaughlin, is startled to see that it is white, and so a throw-back to the Albino, a wild stallion that is the grandsire of Flicka. The colt is named Thunderhead, but is commonly known as the Goblin. Ken reveals that its sire is Appalachian, a black racing stud owned by Charles Sargent, millionaire owner of a neighboring ranch, Goblin grows quickly after being put on the range, and soon overtakes the older colts in development and size. He becomes a sort of mascot to Banner, following the big stallion, and learning all he can. The other colts treat him offshly.

CHAPTER VIII

"Yiminy Crickets!" exclaimed Gus. "Luk at dot colt buck!"

The Goblin tied himself in a knot. his nose and four hoofs bunched; twisted and bounced stiff-legged three feet off the ground. "It's the bronc in him," said Rob disgustedly, "he'll never make a

race horse unless he gets over that." Race horse! The word went through Ken like a flame. Did his

father really believe, then, as he himself believed? Gus walked along the trough pour ing oats from a bucket. The other colts jammed around him, scrim-

maging with each other, burying their noses in the trough. Rob's harsh voice rose, reprimanding them. He liked good manners in his horses. "Here, you fel-

lows! Cut that out!" At his voice Goblin stopped bucking, looked around, shook himself, then, realizing that he was missing something, rushed to the trough, forced himself through the crowd, biting and kicking, stuck his nose in and took a mouthful of the oats. Then he whirled away to the fence and stood there, mouthing the oats, thinking it all over.

That night, across the vast expanse of the snows, flattened under the bright moonlight, Ken rode Flicka bareback up the Saddle Back and down the length of it, looking for the brood mares.

He went very slowly, to make it last longer. He had played a trick on his father. He had kept Flicka in the stable instead of sending her with Banner just so that he could ride her out alone that night and ski back. It hadn't fooled Rob. He had looked at his son hard until Ken had to drop his eyes, but after all he had said he could go.

Far down the ridge Ken found the mares, inky black shadows against the whiteness. Banner came sweeping out to get

Flicka. Ken dropped his skis to the ground, dismounted and removed the bridle.

It took Gobin only one night to learn that something of the utmost importance had come into his life. Oats.

Here was an experience that louched his very soul. What independence! No need to go following and begging behind his mother! No need to paw and scrape at the snow for a few mouthfuls of dried grass! Here was belly-filling heat and strength and deliciousness spread down the long center trough in the corral; once last night, and now again in the morning. What a strange, foreign, altogether seductive taste! He mouthed and grunched it in delight, and if any other colt jostled him he was quick

and vicious with his teeth. A loop of rope fell softly and surprisingly over his head, drew taught and pulled at him. He reacted like

bomb exploding. The boys had halter-broken him in the fall, but since then the pride and kingliness of the mountains and the freedom of the wind, and the rhythm of the plains, and the strength of the storms had poured into him. His spirit was enlarged and annealed. Not for him to be tamely tied and

hed about! The fight was on. Two hours later, sweating, hatless, and nursing one hand which had been bruised by a twist of the rope, Rob said, "I guess he's licked. We'll leave him to think it over. Lucky to have got through that without killing him. God! What power!"

They were all in the corral, Rob and Nell, Gus and Ken. The Gobhlm, worn out at last, successfully haltered but now freed from the soubbing post and the tie rope, was

side of his face. "Ah!" It was a short, explosive

ery from Rob. through the check strap of the hal-ter and it was caught so that he Granny to demand obedience of him. could not withdraw it. Ken started to run to him.
"Stand still," ordered Rob. "If

the blows up now and falls over ridges; no such wild, irresponsible, he'll break that leg."

Ken groaned. The colt, standing on three legs, shuddered and grunted.

The terror of the colt showed only in his eyes. He looked at Rob, at he learns the free gallop down the dying-dead by now, and the coyotes Gus, at Nell and at Ken. Then, steep mountainsider learns to pick and crawling things eating him. A carefully, on three legs, he began to his way at top speed over stony

'Come boy-come Goblin-I'll fix "Come boy-come Goblin-I'll fix For Goblin there was more than it for you-" Nell's voice was en fun and freedom nallouing over the

head down. His foreleg flapped help-

lessly close to his eye,

Reaching her, the colt halted, bent his head and endured it, trembling, while Nell took his foreleg in her hand. She was obliged to unstrap the halter. When the colt felt the sudden release and his leg touched solid ground, he stood heaving, froth dripping from his mouth. Nell put her hands on both sides of his head. As once before, he leaned against her, his face hidden, resting and comforted.

"We'll go," said Rob to Ken. 'She'll do the rest. He's accepted

For an hour Nell played with the colt. She put his halter on and off. She rubbed him dry with a sack. All that he had learned before came back to him now. He gave her his trust, he ate from her hands, he looked into her eyes. She was Goodness. Like the oats. Like shelter. Like warmth. She was for him. She was his mother.

At supper, before they drove Ken back to school, Ken asked his father, 'Do you think he'll ever be tall?" "I fancy so. That Albino must have been over sixteen hands—a whale of a horse. And Goblin throws back to him. He'll probably develop in the same way. Albino might have started with short legs too."

"Well then-if he grows tall, maybe he can be a racer after all." Rob bent his stern blue gaze on his small son. "Don't count your chickens before they are hatched." Ken dropped his eyes. "No, sir."

Early in May came the last big snowstorm, falling on the barren

Something called to the Goblin.

snow there must have been a magical, mothering heat, for when the sun peeled it off, the world was green.

For the colts, the greengrass meant that school was over. They were freed of their nursemaid and curry combs and halters and tie ropes and were put out on the Saddle Back again, and now they were the yearlings, and the band of yearlings of the summer before were the two-year-olds. Banner and his brood mares were

no longer on the upland. On April first Rob had put them in the fenced meadow below Castle Rock. Here was less exposure for the heavy mares and any early foals that nught be dropped. Late spring storms were dangerous to the newborn. Besides, with breeding season approaching, Banner would have his eye out for new mares, and up on Saddle Back there were young spring, would be coming in heat, The stallion, even from five miles away-if he was not under fence -would seek them out and force them into his band. He might fight with and kill some of the young

stallions. Goblin tasted his first greengrass, panting, shaking his head to free it Babyhood was over. He had no of the halter and the trailing rope. mother, needed none. He needed not Suddenly he reared, pawing at the even a trough of oats and the care of men. The whole world under his feet was delicious to eat and his for the taking. And for the first time The colt had thrust his foreleg in his life he was really and com-

There is no such speed on the range as the speed of the yearlings running like deer on the crests and prankish fun, such flinging of small bodies across ravines, such races on the straightaways, such tossing of heads, such frisking of heels. A "Plenty of sense," muttered Rob.
"Look at him. He's thinking. He is all long, piston-like legs, ragged half, and wide, nervous eyes. He hair, and wide, nervous eyes. He Each plunge of his body jerked his badger holes. He is always outdoing himself, surmounting difficul-

ties he never met before.

couraging. Rob and Ken held their | greengrass on the Saddle Back, With the first breath he drew, standing alone on a rise of ground looking south, a new personality entered into him, and it was so keen an excitement that his body tingled. It filled him to bursting with heat and power and fierceness. It drove him. He began investigating the range. The Goblin no longer scrabbled. His legs stretched out with a long powerful clutch. The pasterns bounced him a little at each step, so that he went as if on springs. He trotted tireless-

ly the length of the Saddle Back. Goblin climbed the peaks to stand as Banner had so often stood, his nostrils tremulous for every scent that came, his ears so alertly pricked that they caught sounds from miles away.

Facing the ranch, as Banner was wont to do, the same quivering ran through Goblin at the sight and the scent of it. It was Nell. The remembrance of her hands touching him, gently untangling the strap from his foreleg, quieting him with her voice-then, when it was all over, the way he had rested, his face hidden against her, shutting out the confusion and fear; the way her being there, holding him, had, for the moment, ended all his striving and violence.

Nell and the oats. Nell and the oats and the ranch and the hay mangers where he had found shelter and food in the winter storms. His heart had been won-half his heart. The other half-!

His quivering ceased. He turned away and searched the plains and the high mountains to the south. His nostrils flared, tremulous for windmessages from Colorado, from the jagged peaks of the Buckhorn Hills, from the high plateaus that lay beyond them. He faced the ranch and immedi-

ately the trembling began. A long cry reached him, faint with the distance. Just Rob shouting to Gusthen a dog barking-But the sounds went shuddering through him, making him plunge and prance as if about to rush down the hill.

Then with a grunt and sudden twist of his body he turned again. The air today was so crystal clear that the Buckhorn Hills, etching their fantastic outlines against the deep blue of the sky, displayed a breeze came, sweet and wild and perfumed, and strange-

answered with a loud neigh, and flung himself down the slope. Leveltrot, his head high, his nose pointing up, taking the way toward the open | ing into partnership in a hamburger country and the Buckhorn Hills.

Once the yearlings were out on grass, there was no regular inspection of them during the summer. If anyone chanced to be riding on the Saddle Back a report would be brought home as to their condition and growth, any changes of coloring or appearance, whether the band was split, or whether it had disappeared altogether - which would mean that they were feasting in one of the little ravines of the mountainside and that the next day would see them out in the open again.

But it happened that the very day after Goblin's departure, the boys came home from school. The first thing they did was to fling themselves on horseback and ride out to see the yearlings-the Goblin in particular-and after a thorough afternoon's search, returned and reported him missing.

Everyone hunted for him. Rob drove the car to the neighboring ranches and made inquiries. He posted a notice at the Post Office. The ranch itself was combed from end to end, for it was possible that the Goblin, with a precoclous mares, his daughters, who, with the and unseemly interest in mares, might have joined one of the older bands. But at the end of a week, Rob gave up, and the work of the ranch went on as usual. He said, shortly, that the colt would turn up again. He had run away-he would come back. Horses always did. Once oriented, they returned to the

place of their birth. Ken was stupefied with grief. All winter long he had been thinking of the Goblin, of being with him, of beginning his training. With the money he had been able to save from his allowance, he had bought a slop watch before he left Laramie. His fingers found it almost unconsciously—smooth and round and cool there in the little pocket of his pants beneath his belt. To touch it even had been exciting—as full of promise as Japan.

a dinner bell. Now it was like a dead thing—cold and heavy. When he went to bed at night he invented fantasies of what might have happened to the colt. The earth might have given way beneath his feet as he leaped a ravine,-and learns to jump all natural obstacles, then a fall, a broken leg-lying there clump of shrubs could have hidden cross the corral, going toward Nell, ground studded with shrubs and the corpse so easily—and how many thousands of such shrubs there were on the ranch! That had happened to Dixle, a year ago. They had found the skeleton six months later.

Frank Sinatra seems to be set for the next five years in radio. He's signed a contract for 39 weeks with a cigarette company, with options covering that time: He'll replace "Which is Which," for which "Detect and Collect" substituted this summer. He'll be heard Wednesday nights, on CBS. He says one of the best things about the program is the fact that Mann Holiner will be the producer — thinks Holiner's the best producer in the business.

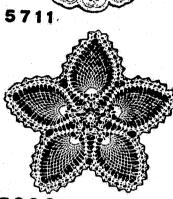

42.00 The only motion picture footage of the atom smasher, which played an important part in experiments leading to the development of the atomic bomb, will be seen in "Miracle Makers," a Warner's short subject now ready for immediate release. Dr. O. E. Lawrence, who developed the cyclotron, as it's called, was technical adviser on the sequence and appears in the film.

Jack Smith, who now has his own show on CBS, joins Bing Crosby, Ginny Simms and all the others who've started on the air singing with a trio and graduated to stardom. Jack was in high school when he and two friends landed the job vacated by Bing Crosby's Rhythm Boys at the Cocoanut Grove. He spends his free time teaching returned soldiers at the New York School of Arteraft Instruments.

Twentieth Century Fox's "The House on 92nd Street," dealing with the development of the atomic bomb, is based entirely on records of the FBI, showing their work in counteracting enemy agents' attempts to obtain the secret. It was made secretly in New York, Washington and other locales, and sequences dealing directly with the bomb were omitted till after it had been used in

ODDS AND ENDS—Guest ghosts galore will haunt "Inner Sanctum," now back again, on CBS, with Paul McGrath as Your Host. . . . Jane Wyman liked that leapard coat she wears in "The Lost Weekend" so much that she had a duplicate made for her own wardrobe. . . . Many of the servicemen now in hospitals are learning the inside stories of actions they participated in by listening to Dan Seymour's "Now It Can Be Told" series. . . . Bing Crosby sings 22 songs in Irving Berlin's "Blue Skies"—a treat for Crosby Jans, who won't be hearing him weekly it he rar. Skies"—a treat for Grosby fans, who won't be hearing him weekly if he carries out his threat to abandon those Thursday night broadcasts.

Pansy and Pineapple Doilies 'Topnotchers'

5806

THE "pansy" doily with its 1½ inch pansies crocheted in shaded purple and lavender thread is really a beauty and the 20-inch "pineapple" doily is one of the laciest and most delicate looking you could possible wish to have!

To obtain complete crocheting instructions for the Pansy Doily (Pattern No. 5711) and the Pineapple Doily (Pattern No. 5806) send 16 cents in coin for EACH pattern, your name, address and the pattern numbers.

Due to an unusually large demand and the current conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. SEWING CIRCLE NEEDLEWORK

Gratitude

The average American's most vivid impression of the Orientwas acquired in less than an hour and came chosen words, presented them with to him free with a bowl of chicken chow-mein. This is no discredit to the average American. He can't help it if Asia is mysterious. It is only an accident that we know a great deal more about Europe. Our ancestors came from that way, so we heard about it.

It is high time now, however, for every soul in the United States, who loves his happy home and peaceful surroundings, to learn more of the character of our straw-colored allies beyond the Pacific. We owe our national safety to them. If it were not for their native integrity we hour, if we were yet able to fight

We Admire Britain Americans are a tender-hearted We sympathize with other peoples and half-way try to understand them, but we don't usually admire them very much. We felt sorry for the Poles when the Nazi took them in 18 days. Our hearts went out to the Norwegians because they didn't last three weeks. We wept with our British relatives over Dunkirk, but we did more. We admired the British.

away over the sea strategists thought that was about the end. It them to Cakland. China had folded up the next day iew people would have blamed he We Americans would have turned the spigot in our sympathy tank again and drawn out a generous sprinkling of tears for dear old China, and then tried to forget it. But forgetting it would have been impossible.

Must Admire China If China had fallen in 1937, four

years before the Pearl Harbor raid, any child can guess why we Americans would still be remembering it. But China did not fall. It would not be amiss for devout people to give thanks at the table three times a day that China did not fall. If China had fallen Japan could have knifed Russia on the unguarded side, right through Manchuria; surely would have done so.

Back in those early months of the present war when the Germans were all but knocking at the doors of Moscow, our big old globe, as now arranged, was coming unglued. If Japan could have drawn close enough to attack Russia from behind, the Germans would have marched into Moscow. Then, with no Russia to annoy him, Hitler would have parched London to a cin-

Thanks to China
China stayed in and fought, so London remains. China stood the gaff, so we still have San Francisco. China could take privation and punishment; her share and ours too. As a consequence no bomb has struck an American city. Moreover, China's young men have made their fight as nearly bare-fisted as any army taking part in this war on either side, large or small.

In recent weeks there have been frequent criticisms of China; of Chinese fortitude, of China's dis-unity, of Chiang Kai-Shek's generalship. Let me close with this admonition: Criticism of China in America today, true or false, has one purpose and one only. It is to break up unity among our allies. Our enemies can hope to survive by no other means. Don't listen to it.

ROWE HILL

Mrs Della Ring of Fert and two youngest children visited her mother, Mrs Margaret Bryant the last week in August, Winnie Hanscom went over while she was here. They came back Aug, 25 and took Mrs Ring home. The children stayed until Sept. 3 when Wilmer Bryant carried them home.

Marjorie Ring visited her grand mother, Mrs Bryant, Sunday night Mrs Vesta Bulmer of Portland was a week end visitor of her sis-

ter, Mrs Margaret Bryant. Mrs Hope Caskey is visiting her parents, Mr and Mrs Colby Ring. Albert Ring made a flying visit there Sunday night, leaving Mon-

day morning.
Mr and Mrs Colby Ring and Hope attended the pictures at Bethel Sunday night. It was Mr and Mrs Joing's 30th wedding anniversary.

Year Ended June 30, 1945 Year Ended June 30, 1944

J. A. MOSSMAN COMMISSIONER OF FINANCE

State of Maine Department of Binance Burrau of Accounts and Control Augusta

September 5, 1945

Governor Horace Hildreth and Members of the Executive Council:

Members of the Executive Council:
Gentlemen:

As provided by Section 31, Chapter 14, of the Revised Statutes of 1944, we submit a condensed summary of the forthcoming complete report on the fiscal operation of the State of Maine for the year ended June 30, 1945, and its financial standing as of June 30, 1945.

The statements show an excess of revenues over expenditures of \$10.612,622 compared with \$12,334,547 for the previous year. The major factors in this decrease were the decline of approximately a million dollars in the employers' tax for unemployment compensation and the increase of almost \$750,000 in expenditures for health, welfare and charities reflecting higher living costs. Of this year's total excess, \$7,500,981 applied to the Unemployment Compensation Fund, while the General Fund had an excess of \$2,928,413.

Bonded debt was reduced \$1,939,000 to \$19,052,500, the lowest at ount at any year end since 1928.

In the case of the General Fund, the excess of revenues over expenditures for the year increased the Unappropriated Surplus at June 30 to \$5,767,455, the largest it has been for many years. Effective as of July 1, 1945, the Legislature has set aside \$990,000 of this amount to increase the Pc t War Public Works Reserve to \$1,940,000 and has made appropriations totaling \$1,854,476 for capital or other non-recurring expenditures, which will reduce this surplus as of July 1 to \$2,922,979. Before the next seesing of the Logislature extending expenditures. made appropriations totaling \$1,854,476 for capital or other non-recurring expenditures, which will reduce this surplus as of July 1 to \$2,922,979. Before the next session of the Logislature, outstanding bonds totaling \$1,500,000 become callable. Should these bonds be called, the remaining surplus would approximate the amount required for working capital leaving no substantial amount available for other numbers.

Respectfully submitted.

Kathleen Norris Says:

By KATHLEEN NORRIS

letter from a girl in Seattle, Wash., whose problem is poised between loyalty to the father who is away in the service, and the

"My own mother died when was nine," writes Jo-Ann Davis. "Two years later my father married a lovely gentle woman who had been my mother's friend. She was a true mother to me, and until her sudden death in a motor accident two years ago, my father and I were happy. Six months after the accident he married a third wife, whom I will call Betty. My father is

44, Betty 28. I am 19.

affectionate.

make any comment on the affair. He Is 'Very Attractive.' I heard it and saw it. Betty stood the portrait up, and it still stands,

but it shows how he feels. "What I want to know is whether it is my duly to write my father fruits and nuts. Drop on greased of this state of affairs. It is very tins and bake at 350 degrees for 15 hard to write him at all and not mention Paul. Yet I don't know what he could do about it, and it seems terrible to tell tales on Betty. spice bar cookies. They are easy I've gone as far as to say to her to pack and they mellow with age: that I hoped Paul wasn't dimming her memory of a much finer man, and for a moment she was serious then her usual laughter broke out and her only answer was, 'Jo-Ann,

Has a daughter a duty to tell her father how her stepmother is behaving while he is away in the army? That is the question posed by a reader, Jo-Ann. She is 19, her stepmother is 28, her father 44. Betty, the stepmother, is very nice, affectionate both to Jo-Ann and her father. Furthermore, she is a good cook and home-manager. Everything was splendid until Jo-Ann's father, an army officer, went

A DAUGHTER'S DUTY

Betty then began to run round with men, stay out late, drink and dance. Lately she has been seeing only one man, a handsome naval officer named Paul. The affair is getting serious, Jo-Ann realizes. She has mentioned the matter to Betty as delicately as she could, but all Betty replied was "Jo-Ann, life is fun!"

To complicate a bad situation, Paul is married and has know what to do. She hates to "tattle" on Betty, whom she still likes very much, yet she feels her father ought to know of his wife's infidelity.

"I feel as if I couldn't just look on at this affair any longer, but I don't know what I can do.'

My dear worried little Jo-Ann, I say in answer, I think you have gone as far as you need go, in giving the firtatious Betty a hint that she is letting the handsome officer infringe upon your father's rights. I wouldn't write him; I think that would be a great mistake. Written words are hard and unmanageable things; to write these words to your father would be to crush the happiest and most confident belief he has.

Your loyalty to him involves only your own conduct, not Betty's. Keep as friendly and unsuspicious as you can; plenty of other tongues will be ready to inform your father of what is going on, if anything really serious is going on. Let your voice always be one of affection for Betty and trust in her.

Leave Betty Isolated.

It would be a good thing if you could go away for awhile, visit an aunt, combine resources with some girl friend, or take a room in the hospital itself. Nothing will straighten Betty out so fast as to feel that she is completely on her own; nothing will warn her admirer more eloquently than to feel that the decks are cleared and that he and she must either end their affair or face possibly serious consequences. Most men with nice wives far away, and baby daughters, have no permanent intentions in regard to a love affair.

But it's a good rule for us all mothers and mothers-in-law, neighbors, spies, gossips, children-not to write suspicions to our servicemen. A casual criticism lightly penned in a pleasant morning-room, with peaceful skies overhead, may gather momentum as it goes overseas, and land with the effect of a blockbuster on a lonely heart. There'll be a lot of explaining and straightening-out to do when your Dad comes home. Leave it to Betty.

Wringer Shells Peas A home-made gadget being used by many farm wives is a pea-sheller made of a clothes wringer hitched to a small electric motor. William Jones of Ballantine, Mont., recently rigged up a sheller of this type. He found an old washing machine wringer, mounted it on a base, added pulleys to regulate the speed of the rollers, then hooked on a small one-fourth horsepower motor. The pods split when they are fed to the rollers, the peas pop out, and the shells pass through to the other side,

Melon Ball-Cottage Cheese Salad wife he left behind him.

> "Dad met Betty on a trip to Chicago; they had known each other but three weeks when they were married. I had never seen her until she came to the house to be my new mother. I am a nurses aid, and it was a great relief to have Betty there managing

things, planning good meals and keeping my adored father happy. I have grown very fond of her; it is impossible not to like her, she is so helpful, cheerful, enthusiastic and

"The trouble is that Dad, who is a lieutenant in the army, was ordered away overseas about seven months ago, and immediately after he left a change came over my young stepmother. She began to go out nights with various men, dancing and dining, and, of course, drinking somewhat, and often not home until early morning hours. Since we were just two women this wasn't so important, for I manage my own breakfast and lunch at the hospital, but what seems to me important is that there is now one man with whom Betty is falling in love. He is constantly here-he is a naval officer on duty near here; all the others have dropped away. Betty has been absent from home all night

more than once in the last month, and she laughs and flushes when I "This man is married, has a wife and two daughters in some eastern state. He is about 32, and very attractive. The other day he walked to the plane and turned my father's portrait face down, saying jokingly, don't think I like this man, Betty.' I was at the other end of the room, telephoning to a friend, but

Optimism Shown Over Bumper Crop Conditions As Government Makes Final Survey for 1945

Wheat Leads Off With Largest Harvest Ever Grown in the Country

America's 1945 farm outlook gives promise of a total production higher than for any year on record except the bumper seasons of 1942 and 1944. Some 350,000,000 acres are due to be harvested, with record or nearrecord productions indicated for a number of crops. Many above average acre yields are anticipated, with record yield of 147.7 bushels per acre expected for potatoes, a nearrecord for rice and an exceptionally high yield for oats, over 7 bushels above the 10-year average and close to the 1942 record. Above average yields are expected for barley, rye, wheat, corn, sugar beets, sugar cane, dry peas, tobacco, sweet potatoes, and a number of the vegetable crops. Milk production may total as much as two to two and a half billion pounds more than in 1944 for a new record.

N. E. Dodd, chief of the Agricultural adjustment agency which has the job of helping U. S. farmers work out acreage goals, reports that dry peas, tobacco and peanuts and that both flaxseed and sugar beets, while not reaching hoped-for goals, are well above the 1944 acreages.

Preserving the Land. Despite the hard use to which the land has had to be subjected during the war years, it is still going strong, Dodd said, one of the main reasons being the influence of increased use of soil building and soil and water conserving practices. A considerable part of this year's expected harvest, he emphasized, can be traced directly to improved methods of handling soil.

Last year set new records, for example, for acreage under contour cultivation and that planted to green manure and cover crops. Acreage of small grains and other drilled crops grown on the contour more than doubled over 1943, and still further increases are seen for 1945. Lime and superphosphate being used to establish soil improving crops are showing rapid increases and would be far greater, according to Dodd, if larger quantities of these vital materials were available, As it is, 87 per cent more superphosphate was used on legumes and grasses in 1944 under the AAA program than the average for 1939-43, and nine times

tion, weed control and many other improved farming practices are also doing their part in holding the fertile top soil on fields and in conserving moisture.

Crop Prospects Reported. Naturally, farm production cannot be calculated as accurately as industrial production. Even if factors such as labor, machinery, storage and marketing, repair parts, fertilizer, and soil conditions are favorable, the farmer cannot be sure that the weather won't upset his welllaid plans. The present harvest is late in some sections due to unseasonable spring weather that in-terfered with planting schedules and in some cases necessitated last minute crop shifts. Drouth, floods and inroads by insects and pests of various kinds can still throw the tarmer's entire production schedule

Wheat - Largest crop of record, and the third U. S. billion-bushel crop. Estimated at 1,146,000,000 bushels, this year's indicated wheat harvest is 67,000,000 bushels above

sin farm. This year's hay crop promises to be the second largest

Ask REA Aid for Wind-Driven Farm Generator

A wartime development - a fourbladed wind-driven generator that will charge its heavy storage batteries in a 5 mile wind, and with an average wind velocity of only 10 miles per hour, will provide 1,000 kilowatt hours of dependable pow-

er per month. for house, barn, chicken houses and

The entire cost of these systems is in maintenance and repayment of investment. A large percentage of farmers, unable to secure electric service, due to cost of installing power lines, will profit by the fourbladed wind-driven generator. Steps are now being taken to secure the This is enough to provide lights approval of the REA so that the generator may be purchased under pig brooders, in addition to operate some form of REA loan, by those ing an electric refrigerator, a water who do not have access to rural system and other household items.

protect the soil from erosion and to help increase crop yield.

average.

with yield indicated at 1,074 pounds

per acre, below 1944 and 10-year

Soybeans — A total of 13,283,000

acres grown alone for all purposes

appears to be about 46 per cent

larger than the 10-year average.

Eighty-three per cent is in the north

central states. Indications are that

about 10,392,000 acres will be har-

point to a crop of 188,284,000 bush-

if expectations of 147.7 bushels per

acre for the United States are real-

cated acreage for harvest is 2,845,-

Sweet Potatoes - Fewer sweet

in prospect is 67,133,000 bushels.

about 1,300,000 tons is predicted.

per cent more than the 1934-43

average. Louislana, which normal-

the national acreage, increased 1

per cent over last year and Flor-

pears are usually grown, expect a

record combined production of 26,-

031,000 bushels — 11 per cent more

than last year and 30 per cent above

average. The cherry crop is down

considerably from last year's level

000 tons. A prune crop of some 152,-

600 tons (fresh basis) is indicated

from Washington, Idaho and Ore-

a little above last year with an indi-

cated pick of 2,801,900 tons, of which

some 2,598,000 tons will come from

Hay - Second largest hay crop

ever produced in the U.S. is ex-

pected this year - a total produc-

tion of all tame and wild hay vari-

eties of about 104,000,000 tons. Only

1942 has seen more hay cut on

American farms. A probable 12,-

000,000 tons carried over from crops

of previous years added to the 1945

production would provide a supply of

Flaxseed - Indications are that

a flaxseed crop over half again as large as the average for 1934-43 will

be harvested in 1945, a total of 33,

972,000 bushels. This would be 44 per-

cent greater than the 1944 crop. Nine

of the 17 states for which flaxseed

acreages have been estimated show

increases over 1944, ranging from 1

per cent in Iowa to 81 per cent in

Texas. In the four major flax states

- Minnesota, North Dakota, South

Dakota and Montana - where ap-

proximately 88 per cent of the 1945

crop will be produced, the increase this year is 49 per cent.

California.

116,000,000 tons.

above the 1944 total tonnage.

1934-43 average.

the previous record crop of 1944. It | Pacific Northwest. About 514,000 1945 goals appear to have been met is 43 per cent greater than the 10- acres are expected to be harvested, or exceeded for wheat, oats, rice, year average for 1934-43. Winter with yield indicated at 1,074 pounds wheat production is up 14 per cent over last year. Estimated acreage of all wheat for harvest is 64,961,000 acres, 9.5 per cent above 1944, with winter wheat acreage substantially above last year in nearly all important producing states.

Oats—Oats production is expected to be the largest since 1920, a total of 1,546,032,000 bushels. This is 33 per cent above the 1944 crop and 45 per cent above the 10-year average. Indicated yield per acre is 36.9 bushels. The estimated planting of 45,911,000 acres in 1945 is the largest of record. This is the sixth consecutive year in which the oats acreage shows an increase for the country as

Corn - Marked improvement in prospects during July has resulted in an August 1 estimate of about 2,844,000,000 bushels of corn in 1945. The current estimate, while below three successive 3,000,000,000-bushel crops in 1942, 1943 and 1944, exceeds production in any year except 1923 600, slightly below last year and and 1932 of the two preceding dec- about 190,200 acres less than the and 1932 of the two preceding decades. The average yield of 30.8 bushels compares with 29.1 bushels estimated a month ago, 33.2 bushels last year and the average of 26.8 bushels per acre. Most important corn growing states had "corn weather" during the latter part of July, favoring | highest since 1929. Total production better than average progress called "remarkable" in some sections-to bring an increase of 159,-000,000 bushels in prospect since

Ryc-Indicated production of 27,-883,000 bushels is up slightly more than 2,500,000 bushels over last year, the result of a higher per acre yield since the acreage for harvest is 7 per cent smaller. This is still only two-thirds of the 1934-43 average

production. Rice-If the indicated harvest of 76,000,000 bushels is realized, it will be the largest rice crop on record, and more than 8 per cent above last year's record level. A prospective yield of nearly 50 bushels an acre plus a near-record seeding of 1,511,-000 acres, is credited with the new high. Acreage increases are reported in each of the rice producing states — California, Louisiana, Texas and Arkansas - with farmers in the first two named exceeding re-

ported March intentions. Barley — The expected harvest of 270,000,000 bushels will be 5 per cent below the 1944 production and 1 per cent less than the 10-year average. Sharp declines are indicated in all of the major barley producing states, except California. The entire acreage seeded, an estimated 11,922,-000 acres, is about 17 per cent less than 1944 and 19 per cent below av-

Dry Beans-The smallest production since 1936 is anticipated for 1945, the indicated total of 14,714,-000 bags of 100 pounds each (uncleaned) being more than onefourth less than the record-breaking crop harvested in 1943. Bean plantings in Michigan and New York total 711,000 acres, the smallest since 1939 and less than were planted in Michigan alone in 1941. Farmers appear to be reducing their plantings to about the level of the years before the present war.

Lima bean production is expected to be a little larger than last year, California's 178,000 acres marking an increase of 8,000 acres over 1944. Dry Peas - Although considerably less than last year's big crop, the 1945 production will probably be about double the prewar average for a total of some 5,500,000 100-pound bags (uncleaned). Acreage this year, also double the prewar average, is concentrated mainly in the

eloquence always attracted a large crowd. It was a hot July day, and the courtroom was literally steamng as the veteran lawyer worked up to his oratorical peak. Except for the judge, the listeners were

ransfixed.

Red-faced and perspiring, the magistrate mopped his brow, loosened his collar and at last removed nis coat and turned to the speaker: "Mr. Attorney," he interrupted, "I wonder if you would let Dawes speak for a while. I want to thin out

Dawes was reputedly a poor speaker in his youth. As one of the lawyers

in an important case, he was op-

posed by a seasoned attorney whose
